

California Community Transmission By County

California has been reported by the Center for Disease Control and Prevention (CDC) as one of the highest “reported cases” states in the US infected by the coronavirus (COVID-19). The state’s population was also reported by the U.S. Census Bureau as having 39,512,223 MILLION people as of July 2019.

San Diego is approximately 100 miles away from Riverside County. The **CDC** has been reporting since the discovery of the coronavirus disease (COVID-19) back in December 2019 and the California Department of Public Health (**CDPH**) had reported on March 13, 2020 that **ONLY 5 deaths** are associated with the virus across the ENTIRE state of California. Mainly these are from high-risk individuals, such as the elderly.
